Instructor Client Testing Plan

Instructor View

Student List View
Client should load a list of all students that have taken the exam:

Back   Create Exam

Student List

Jack Walter

Jacob Williams

John User

Noah Sandford

Test User

Clicking on a student should display their answers. For example, clicking "Jack Walter" will yield the following:

Back

What's the best programming language?

○ C#

○ Java

● TypeScript

○ Fortran

Computer Science is dope.

● False
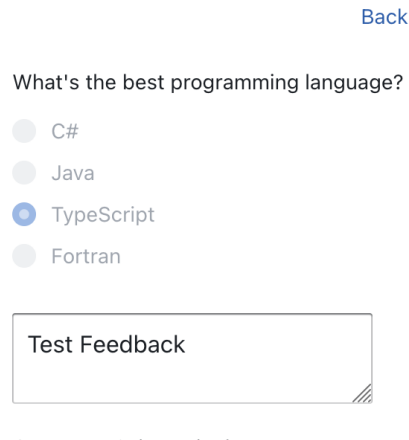

○ True

How do you feel today?

Pretty good

Ensure that he has answered "TypeScript", "False", "Pretty good", and **undefined** for the coding answer question, since he did not answer that question.

Back Button

Clicking the "Back" button at the top of the page should bring you back to the list of students.

Feedback

Typing in a feedback box should change the text:

Back

What's the best programming language?

○ C#

○ Java

◉ TypeScript

○ Fortran

Test Feedback

Pressing the "Submit Feedback" button at the bottom should take you back to the list of students. Then, clicking back on the student you were on should persist their feedback.

Create Exam View
Clicking on the "Create Exam" button at the top of the Instructor View should yield the following display:

Back

[+]

Done

Clicking the "+" button should present the user with the following options:

Back

[+]

MultipleChoice

ShortAnswer

TrueFalse

CodingAnswer

Clicking "MultipleChoice" should present the following display:

Back

Question Text

[   ]

Answer Choices

[   ]

| + | | − |

Index of Correct Answer

[0   ]

Add

Clicking "TrueFalse" should present the following display:

Back

Question Text

[   ]

Enter 1 for True or 0 for False

[0   ]

Add

Clicking "ShortAnswer" or "CodingAnswer" should present the following display:

Back

Question Text

[   ]

Add

Now, clicking the "Add" button on any of the components should create a question with the given values. For example:

Back

Question Text

Test

Answer Choices
